## SYNOPSIS

### Avishkar 2025-26 UG-Short Term Research Program

**Subject-** Efficacy of Kali Phos 200 in reducing stress level, assessed by lab reports clinical co-relation.

**1.Aim:** Efficacy of Kali Phos 200 in reducing stress level, assessed by lab reports clinical co-relation.

**2.Objective:**

- Administer drug kali Phos 200 by single blind method for 14 days in 10 volunteers (19-22 age)
- To compare data-values in pre-report intervention condition.
- To assess subjective improvement in sleep & fatigue.
- Efficacy of kali-Phos 200 in stress conditions is analysed.

**3.Hypothesis:** On reviewing literature on physiology stress matter & chemicals like GABA are inversely proportional to cortisol & NLR ratio which may reduce by kali Phos 200.

**4.Materials & Method:**

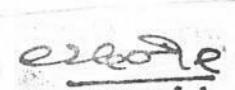

- A selection of 10 volunteers (19-22 years of both sexes) is selected.
- Baseline blood investigation – CRP, CBC (N/L ratio), HAM-A scale are recorded on day 0.i.e (28/11/25 at 6.00 pm)
- Volunteers receives kali-Phos 200 daily for 14 Days x 4 glbs x OD.
- Vitals and sleep duration are noted daily. Observed and interacted for 14 Days.
- On day 14, CRP, NLR, HAM-A scale is repeated.
- GABA and cortisol are analysed on the basis of stress markers. Data collected i.e. from lab and by examination of volunteers.

**5.Results:** Most volunteers expected to show mild reduction in CRP, NLR, HAM-A score with improved sleep and reduced tiredness. No adverse effects reported and expected

**6.conclusion:**

- Data analysed on the basis of statistical graphic presentation.
- Kali-Phos 200 may help reduced stress related markers and improved overall well-being in students.

Further studies with larger samples are recommended.

# Title : To Check the efficacy of kali phos-200 in reducing stress levels, assessed by lab reports and clinical co-relations

## INTRODUCTION :

Stress levels are high among adults due to

- Academic pressure
- Competitives exams.
- Life style, etc.

Prolonged stress affects

- Physiological health
- Psychological health
- Sleep cycle
- Other vitals, etc.

Homoeopathy offers holistic approach for stressed and anxiety prone people.

## KALI PHOSPHORICUM - INTRO :

Potassium + Phosphate ( $K_2HPO_4$ )

Neurons of brains cells in -

- Nissles
- Nucleic acid
- ATP, ADP, AMP
- Creat. Phos.

Daily req.  $K^+$  - 1875 - 5625 mgm

$K^+$  content decreases systematically after 20 years (Kali - family by Ajit Kulkarni)

Nerve remedy + Brain tonic

Brain fag leads to + Weak memory + Difficulty in concentration

Nissles granules are regenerated during resting phase with the help of Kali phos.

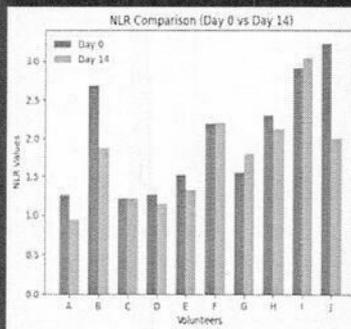

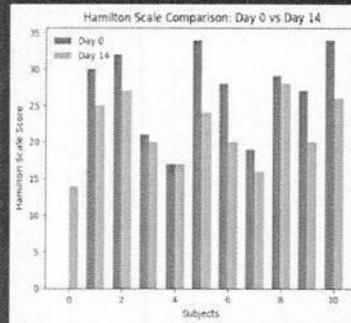

## AIM :

To evaluate the efficacy of kali phos 200 in reducing stress levels, assessed by lab reports and clinical co relations among anxious and anxiety prone students.

## OBJECTIVES :

- To assess stress levels in college students (age 19-22 years)
- Administer drug kali phos 200 by single blind method for 14 days in 10 volunteers
- To compare data in pre and post intervention by report interpretation

## RESULTS :

## Pre treatment

- No stress - 0%
- Mild stress - 30%
- Moderate stress - 40%
- Severe stress - 30%

## Post treatment

- No stress - 20%
- Mild stress - 40%
- Moderate stress - 40%
- Severe stress - 0%

## Key Observations :

- Reduction in overall stress scores was observed after Treatment.
- improvement noted in Symptoms such as fatigue, irritability and sleep disturbances.
- 5/8 females shown Symptoms of Leucorrhoea (i.e. pale to yellowish, thick along with mild vaginal contractions)
- Sleep duration range was 5-9 hours and now improved by 7 to 9 hours range.

## METHODOLOGY :

- Study design - Pre & post interventional study
- Study population - 10 college students (age 19-22)
- Assessment tool -
  - Hamilton anxiety rating scale
  - NLR and GABA
  - CRP
  - Vitals - Respiratory rate
  - Pulse rate
  - B.P.
  - Sleep durations
- Intervention - Kali phosphoricum 200
- Duration of study - 2 weeks

## DISCUSSIONS :

Study findings suggests that Kali phos 200 has a positive role in reducing stress levels among college students.

- Pathological stress  $\rightleftharpoons$  Mental Stress
- NLR, CRP, hamilton score reduced and GABA increased.
- Improvement in sleep durations and stability in vitals.

# KEY OBSERVATION

- ▶ Reduction in overall stress scores was observed after Treatment.
- ▶ Maximum improvement was seen in students with mild to moderate stress.
- ▶ Improvement noted in symptoms, such as fatigue, irritability and sleep disturbances.
- ▶ 5/8 females showed the problem of leucorrhoea, but according to Dr Kent's Literature, Mental symptoms are relieved after physical discharges.
- ▶ Sleep duration range was 5-9 hours and improved by 7-9 hours.

# KENTS REASONING

- ▶ Mental symptoms arise from disturbance of vital forces.
- ▶ If the body finds a natural channel for discharge, the intracranial pressure may reduce.
- ▶ Hence, mental relief after discharge can be a valuable guiding symptom.

## DISCUSSION

- ▶ The study findings suggest. Kali Phos 200 has a positive role in reducing stress levels among college students/volunteers.
- ▶ Physiological stress affects mental health/state vice versa.
- ▶ Improvement in mental and emotional symptoms supports the homeopathic indications of the remedy.
- ▶ NLR, CRP and Hamilton score reduced, and GABA(Reduce, Anxiety, Stress and inflammation) increased NLR and inhibitory neurotransmitters.
- ▶ Improvement in sleep durations and stability in vitals over the periods.

## CONCLUSION-

Kali pho 200 was found to be effective in reducing stress levels among students and can be considered a safe and supportive homeopathic intervention for stress management, and can be used for Brain fog, weakness/sleeplessness after mental exhaustion.

# SYNOPSIS

## Avishkar 2025-26 UG-Short Term Research Program

**Subject-** Efficacy of Kali Phos 200 in reducing stress level, assessed by lab reports clinical co-relation.

**1.Aim:** Efficacy of Kali Phos 200 in reducing stress level, assessed by lab reports clinical co-relation.

### **2.Objective:**

- Administer drug kali Phos 200 by single blind method for 14 days in 10 volunteers (19-22 age)
- To compare data-values in pre-report intervention condition.
- To assess subjective improvement in sleep & fatigue.
- Efficacy of kali-Phos 200 in stress conditions is analysed.

**3.Hypothesis:** On reviewing literature on physiology stress matter & chemicals like GABA are inversely proportional to cortisol & NLR ratio which may reduce by kali Phos 200.

### **4.Materials & Method:**

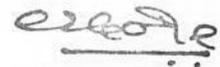

- A selection of 10 volunteers (19-22 years of both sexes) is selected.
- Baseline blood investigation – CRP, CBC (N/L ratio), HAM-A scale are recorded on day 0.i.e (28/11/25 at 6.00 pm)
- Volunteers receives kali-Phos 200 daily for 14 Days x 4 glbs x OD.
- Vitals and sleep duration are noted daily. Observed and interacted for 14 Days.
- On day 14, CRP, NLR, HAM-A scale is repeated.
- GABA and cortisol are analysed on the basis of stress markers. Data collected i.e. from lab and by examination of volunteers.
